Aquapure™ Quick Drop 20

DESCRIPTION

Aquapure™ Quick Drop 20 is a proprietary blend of clay minerals, polymer and pH adjusting agents which allow encapsulation and flocculation of emulsified oils from various wastewater streams. This ONE-STEP system offers a simple alternative to multiple tank treatments while ensuring that the treated effluent will meet POTW discharge limits established by local and state authorities. Aquapure™ Quick Drop 20 captures solids and masses them together to quickly settle suspended particulate. This is a granulated blend offering less dust than other powdered products. The Aquapure™ Quick Drop 20 requires vigorous mixing for best efficiency.

USE PARAMETERS

Dosing should be determined by jar testing on a 250 ml waste water sample. A beginning dose for a 250 ml jar test is typically 0.5 gm / 250 ml with high speed mixing. This can be increased in increments of 0.5 gm until the desired clarity is obtained. The higher the solids, the higher the dose. Dosing per gallon can be 1/2 oz to 4 oz/gal of wastewater.

Aquapure™ Quick Drop 20 comes in granular form and is available in 50 lb bags.
